

ENVIRONMENT POLICY

CA&I is involved in the construction of public domains and installation infrastructure. We recognise environmental management as one of our corporate responsibilities and priorities.

CA&I is committed to the continued monitoring of its environmental management system and maintains accreditation to ISO 14001 : 2015.

We are further committed to a process of continual improvement of our environmental activities together with their alignment to process management, product quality and workplace health and safety activities.

Our environmental policy also considers factors involving pollution prevention, resources and waste management and impacts of the project work on the environment.

The management of this company is actively involved in ensuring that company personnel, sub-contractors and suppliers are pursuing similar policies and are complying with the environmental policy requirements of this company.

Implementation and operational control of CA&I Safe Working Methods containing environmental impacts and controls is undertaken on a project specific basis. Upon entering a contract, CA&I will where relevant produce the following documents:

- Project Environmental Plan
- Standard Report Forms
- Monitoring procedures
- Reporting and Records
